

高效率
High Efficiency

耐久性
Durability

遮光罩
Louver

Acrostar是我們新型之高效能投光燈，從燈具設計上之改善，可以大幅減少漏光。先進的物料技術應用，增加反射功能，配合專用之高效能燈泡，使燈具整體效率比傳統之投光燈高出達38%。

特色：

1. 高效率

- 新穎之反射罩設計(減少光源浪費)
- 液體玻璃處理反射罩(增強反射功能，減低塵埃積聚)
- 鍍上增強反射膜(增強反射功能)
- 配合專用之高效能金鹵泡，達至5500K色溫及Ra92顯色指數
- 減少燈具數量
- 減低安裝成本
- 減低耗電量

2. 耐久性

- 鑄鋁燈身
- 液體玻璃處理，防止腐蝕
- 使用環保型耐用塗粉

3. 遮光罩

- 備有內置或外置的遮光罩，減少對夜空及周邊之環境影響及光線污染

Acrostar is our new type high efficiency floodlight. The design improvement of fixture can reduce most of the light spillage. The utilization of the high quality materials and latest technology can increase the reflectance. With the combination of our high efficiency lamp, the efficiency of the floodlight can be increased by 38%.

Features:

1. High efficiency

- New design of the reflector (reduce the light loss)
- Alglas reflector (Increases reflectance and reduce the deposition of the dust)
- Albrain finished (increase the reflectance)
- Specific high efficiency metal halide lamp with 5500K, Ra92.
- Reduce the quantity of the fixture
- Lower the installation cost
- Reduce the power consumption

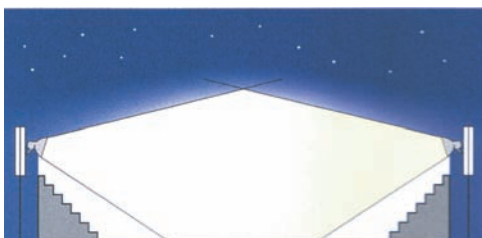

2. Durability

- Die Cast Aluminium Alloy body
- Using environmental friendly powder painting
- Alglas Reflector, Anti-Corrosion

3. Louver

- Choices of built in or extend louver, minimize the light pollution of the sky and surrounding area.
